MFA Money Market Fund

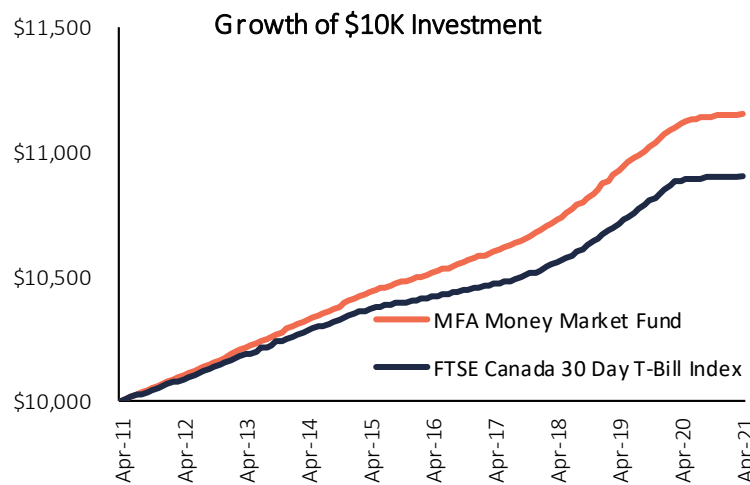

The principal objective of the Money Market Fund is to provide participating investors with interest income through investing primarily in high-quality money market instruments. The Fund will hold assets with maturities no longer than 366 days.

Over the month, long-term Government of Canada bond yields increased marginally more than short-term Government of Canada bond yields, resulting in the yield curve steepening further. Against this backdrop, the MFA Money Market Fund returned 0.01% over the month, performing broadly in line with the benchmark.

MFA Government Focused Ultra-Short Bond Fund

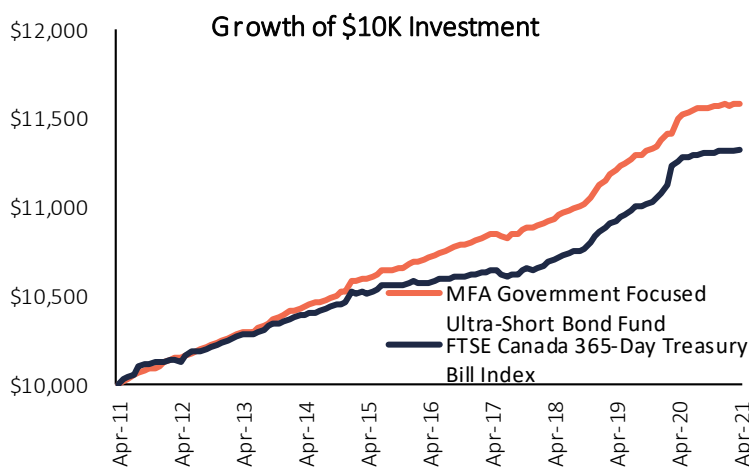

The principal objective of the Government Focused Ultra-short Bond Fund is to provide participating investors with interest income. The Fund aims to achieve moderate capital appreciation by actively managing Fund investments. The Fund will hold assets with maturities no longer than 2 years at the time of purchase.

Over the month, the MFA Government Focused Ultra-Short Bond Fund returned 0.03%, outperforming the benchmark. The fund remains biased towards high-quality provincial and financial corporate bonds given their yield advantage over similar term federal bonds.

MFA Bond Fund

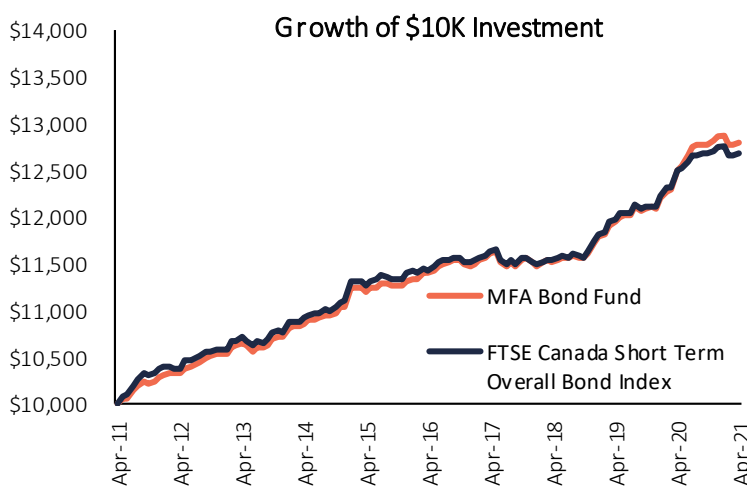

The principal objective of the short-term Bond Fund is to provide participating investors with interest income. The Fund aims to achieve moderate capital appreciation by actively managing Fund investments. The Fund will hold assets with maturities no longer than 7.25 years at the time of purchase.

The MFA Bond Fund returned 0.18% over the month of April, performing in line with its benchmark. The portfolio's overweight exposure to corporate and provincial bonds was additive to relative returns, but this was offset by the portfolio's yield curve positioning, which dragged on relative performance.

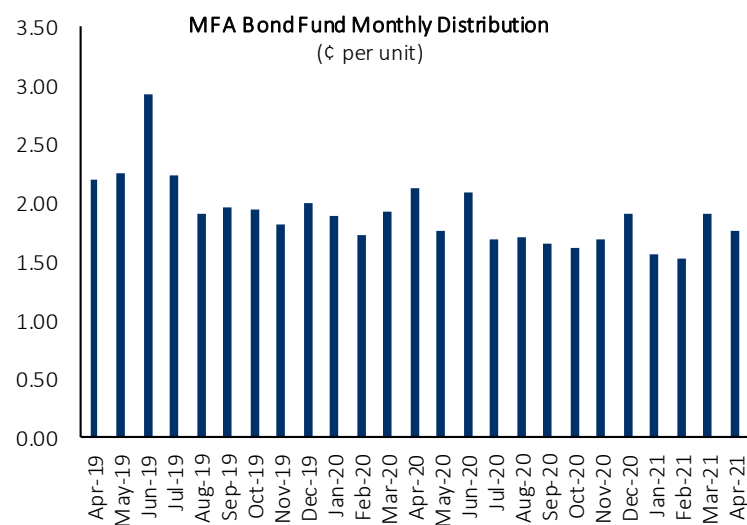

Total Return (%)	1 Month	3 Months	YTD	1 Year	3 Years	5 Years	Since Inception ²

MFA Fossil Fuel Free Short Term Bond Fund

The principal objective of the Fossil Fuel Free Short-Term Bond Fund is to provide participating investors with interest income. The Fund aims to achieve moderate capital appreciation by actively managing Fund investments. The Fund will hold assets with maturities no longer than 7.25 years at the time of purchase. The Fund shall not invest in securities of Issuers directly involved in the extraction, processing and transportation of coal, oil, or natural gas (“fossil fuels”).

Over the month, the Fossil Fuel Free Short-Term Bond Fund returned 0.17%, performing in line with its benchmark. The portfolio’s overweight exposure to corporate and provincial bonds was additive to relative returns, but this was offset by the portfolio’s yield curve positioning, which dragged on relative performance.

MFA Mortgage Fund

The principal objective of the Mortgage Fund is to provide participating investors with interest income, and diversification benefits by capitalizing on the illiquidity premium offered by the Canadian commercial mortgage markets. The Fund shall indirectly invest primarily in first mortgages on income producing commercial properties in Canada with an average term of 2 to 5 years.

The MFA mortgage fund returned 0.23% over the month, outperforming its benchmark. Mortgages ended the month of March at a yield of 192 basis points over similar-term Government of Canada bonds. Spreads compressed 2 basis points over the month which provided a tailwind for performance.
